Job Highlights

- Software Applications Development
- C/C++, Java, Javascript, Python, SQL, Rust, HTML
- Computer Science/Engineering, IT, Programmer
- Full time, immediately available will be preferred

Job Description

Accenture Technology continues to spearhead its role in elevating market efficiency. This is your opportunity to be a part of these exciting times. Come and join us if you are:

- Excited and looking forward to the next stage of technology revolution
- Passionate in technologies and striving to make a difference with the aid of automation
- Interested to make an impact to the society by helping industry-leaders elevate their business efficiency
- Enjoying being in the community of great and enthusiastic people who share goals and accomplishments
- Striving to perform, inspire, progress and achieve more

Key responsibilities include:

- Supporting the technical design process by participating in the analysis of technical application requirements
- Assisting in implementing analyses that will identify requirements related to people, processes and technology
- Participating in implementing the technical infrastructure, including networks, platforms and servers, enterprise enabling, application enabling, security and operations management
- Assisting in the integration of technical and application components to meet business requirements
- Coding and testing program modules that meet design specifications; assisting in the design
- Maintaining, tuning and repairing applications to keep them performing according to technical and functional specifications; providing user support
- Participating in execution and documentation of tests necessary to ensure that an application or technical environment meets performance requirements
- Executing conversion plans and documenting possible improvements; identifying disruptions in the processes

Learning from the Internship:

- Participate in our projects and work with some of the most established companies in Hong Kong
- Gain business knowledge about specific industries, and deepen functional know-how
- Learn the full solutioning cycle - from idea origination to design to solution delivery
- Acquire experience in delivering large scale advanced technology solutions
- Practice modern delivery methodologies to upgrade delivery skillset

Interested students can apply through [JobsDB/LinkedIn](#) or send the application directly to Mr. Leo Liu (leo.y.liu@accenture.com)

Application deadline is 7th Feb or until the position is filled.
