

# Software Engineer at MeeOpp

## The Company

MeeOpp is an education technology startup building a cutting-edge personalised learning system for schools, students and teachers. Our goal is to maximise the potential of every student through the use of technology. We are rapidly expanding to meet demand and would be delighted to meet individuals who share our vision and enthusiasm.

Our passionate team combines expertise in the fields of education and technology, and aims to solve the biggest challenges that classrooms face in the 21st century.

Our pay is competitive with a potential performance bonus, and the job includes great perks: medical and dental benefits, paid time off, snacks, and team activities. Our office is just a five-minute walk from Central HK and two minutes from the Sheung Wan MTR station. We offer a great working environment, with a modern office space and an innovative work culture, with huge potential for career growth and career remuneration based on performance.

## Responsibilities:

As a software engineer joining a high-paced and fast-growing EdTech startup, we are looking for someone who can quickly adapt and take ownership of tasks at hand. With exciting growth opportunities ahead, we are looking for a passionate individual who is optimistic and ready to be a part of an expanding team.

Your responsibilities will include working with the development team to implement new features on both the front end and back end. You have some experience with React, and are eager to get more experience while working on a meaningful product with a highly experienced and motivated team.

## Why you're a fit for the role:

- You have web application development experience on both the front and back end
- You're comfortable working in an agile environment and iterating quickly
- You enjoy technical challenges and finding elegant solutions to complex problems
- You're a team player who enjoys collaborating with and helping others

## What you need:

- Fluency in at least one modern programming language
- Experience with at least one major web framework (Django, Rails, Express, etc.)
- Familiarity with React
- Experience using Git and working in a Unix-based environment

## Bonus points for:

- Understanding of Redux
- Experience with other technologies in our stack (MongoDB, Docker, NodeJS, Feathers.js, Redis)
- Portfolio projects, contributions to open-source projects, or any other examples of your work you're able to share
- Experience or demonstrated passion in education technology

**Language requirements:**

- English fluency
- Conversational Mandarin or Cantonese is a plus

**Your benefits:**

- Medical insurance
- Dental insurance
- Performance bonus
- Mentor and coaching from a senior team with silicon valley and international corporate experience
