

BEYOND LIMITS

IM Intelligent Memory Ltd is a fabless memory company and specialized in design, testing, manufacturing, and logistics of memory product for the global industrial market. Our company was founded in 1991 and grows steadily in our history. Most of our customers are tier one companies in their engaged fields including telecom, industrial computing, high-end server, medical equipment, and etc. To cope with our expansion, we are now looking for ambitious candidate to join us.

Key responsibilities included:

- Involve in various production and quality daily operation related tasks
- Participate in different production and quality system review enhancement and data analytics projects
- Handle other ad hoc tasks if required.

Requirements:

- Major in Industrial Engineering or relevant discipline
- Knowledge in Microsoft database-related applications, such as Access, SharePoint, would be an advantage
- Strong in problem solving and critical thinking ability
- Positive attitude and enthusiasm in the performance of responsibility
