

Application Engineer – Engineering Solutions

Numerous **Application Engineer** positions for high caliber engineering graduates with desire to expose themselves to the state-of-the-art technologies and learn how to apply it in various product development.

It will involve crossover of different technologies, such as edge artificial Intelligence, embedded system, connectivity, smart sensing, in different emerging and exciting applications, for example, autonomous driving, 5G, condition-based monitoring, robotics and health care. The positions will provide opportunity to learn from Arrow's wide range of technology partners, get fully involved in hardware/software design work and testing, project management, and facing customers to receive feedbacks. These are all very valuable experience for young talents' growth.

What You'll Be Doing

- Be part of the Application Engineering team to design, and to develop solutions to meet business development requirements.
- Manage full development lifecycle including testing, and implementation.
- Perform solution design, verification, and support, which may require in-depth analysis and testing.
- Execute, assess, and troubleshoot programs and applications.
- Analyze and debug errors in a timely and accurate fashion, and participate in upgrades, revisions, fixes, and patches as requested.
- Design, develop and document specifications throughout the project lifecycle.

What We Are Looking For

- A Bachelor's degree in Electronics/Computer Engineering or equivalent is required.
- Candidate with 1 to 2 years of related experience is preferred. **Fresh Graduates are welcome.**
- Experience in software development (in C, Java or Python) is required; Neural Network programming experience is advantageous.
- Quick learner.
- Passion to innovate and a desire to seek out solutions to problems.
- Work with colleagues and contribute as a team.
- Possess strong written and verbal communication skills.
- **Must be able to travel and temporarily station in Greater Bay Area (no more than 6 months).**
